

## EXPRESSION OF INTEREST FOR A HORIZON 2020 PROJECT

### INFORMATION ABOUT THE CALL FOR PROPOSALS

**LC-GD-7-1-2020** Restoring biodiversity and ecosystem services

### INTRODUCTION

Ecological Counseling Center Cahul (ECC Cahul) is a nongovernmental organization established in 1999 in Cahul, Republic of Moldova.

Our goal is to contribute to the protection and restore of the ecosystems of natural environments in the South region of the Republic of Moldova. We have excellent working relations with local and regional Public Administration, regional and national NGOs in the area and local communities.

We are active in management of EU cross-border projects. Our team has a good experience in dissemination and exploitation of project results. ECC Cahul is permanently involved in activities connecting to environmental policies and strategies.

### AREA OF POTENTIAL CONTRIBUTION

Due to the geographical position of ECC Cahul, the most part of the activities of the organization are implemented in the Lower Prut area. With regional and national joint efforts the area received in 2018 the status of Biosphere Reserve Lower Prut which encompasses the Prut River and floodplain lakes. Two-thirds of the surface of the area is occupied by Lake Beleu. A wetland area extends along the Prut River, covering a mosaic of water, meadow and forest ecosystems.

In this context we are interest to implement in the Lower Prut area innovative actions for biodiversity and ecosystem restoring.
